

MoU SIGNED BETWEEN AUBURN UNIVERSITY, USA AND NITC FOR COLLABORATIVE RESEARCH ON PHOTONICS

A memorandum of understanding has been signed between NITC and the Photonics Materials Research Laboratory at Auburn University, USA for collaborative research in the area of unconventional electronics and photonics. This MoU has been signed by the Director on behalf of the NITC last month in the presence all Deans of the institute. The MoU is based on the ongoing collaborative research activities involving the research groups lead by Prof. P.Predeep at the department of Physics at NITC and Prof. Mrinal Thakur at the department of Materials and Mechanical Engineering at the Auburn University. This MoU envisages exchange of faculty and students, utilization of experimental facilities at the Photonics Materials Research Lab at Auburn University and the Laboratory for Unconventional Electronics and Photonics at NITC.
